Before you can send text messages you need to create an account. Messages are bought in blocks of 1000 at 6p each.

To send the text message you need select the appointment dates (usually tomorrow) and press the TAB key. All of the patients that have an appointment and a mobile number in the SMS field will be displayed. When you are ready to proceed, click on the Send messages button.

The messages will be sent within 5 minutes and you will receive an email telling you how many text messages were sent out and how many credits you have left on your account.

PPMS will only send messages to UK registered mobile phones that start with 07 and text messages have a maximum size of 160 characters. The details of the message can be configured using the Preference button on the appointment diary.
